This badging system works well in conjunction with the Badgr website (badgr.com) but could also be adapted to any type of database, including a spreadsheet based system.

On Badgr.com, the issuer creates a badge, including the icon image, description, and earning criteria. Once created, the badge can be awarded to people based on their email address. It is possible to upload a spreadsheet of names and emails to award the same badge to many people at once.

The badging system shared in this folder was created collaboratively during the fall of 2022 by Leanne Born (leborn@cps.edu, NGHS STEAM Specialist) and Ivy Abid (ieabid@cps.edu, NGHS STEAM Program Manager) of North-Grand High School in Chicago, Illinois.

All aspects of this system, including written content and art, may be used by public schools for educational purposes. No aspect of this badging system or content should be used for monetary gain. Individuals who adopt this system should credit its creators when appropriate.
