Funding for this project was provided through a Grant Agreement from the Illinois Community College Board, utilizing Perkins Leadership funding.

**About ICCB**

In 1965, the Illinois General Assembly established the Illinois Community College Board to create a system of public community colleges that would be within easy reach of every resident. Today, the Illinois Community College System covers the entire state with 48 colleges and one multi-community college center in 39 community college districts. Community colleges serve nearly one million Illinois residents each year in credit and noncredit courses and many more through their public service programs.

Illinois’ community colleges meet both local and statewide needs for education and workforce development through high-quality, affordable, accessible, and cost-effective programs and services. Learn more at [iccb.org](http://iccb.org).

**About Education Systems Center**

Education Systems Center (EdSystems) is a mission-driven policy development and program implementation center based within Northern Illinois University’s Division of Outreach, Engagement, and Regional Development. EdSystems’ mission is to shape and strengthen education and workforce systems to advance racial equity and prepare more young people for productive careers and lives in a global economy. EdSystems helped drive the development and adoption of the Postsecondary and Workforce Readiness Act ([pwract.org](http://pwract.org)). Learn more about EdSystems at [edsystemsniu.org](http://edsystemsniu.org).
About the Model Programs of Study Guide

The Illinois Community College Board (ICCB) sponsored the development of Model Programs of Study Guides in crucial industry areas as part of the Illinois State Plan for Strengthening Career and Technical Education for the 21st Century Act (also known as the Perkins V Plan). This Guide was developed in consultation and collaboration with the Illinois State Board of Education (ISBE) through a process led and facilitated by Education Systems Center at NIU (EdSystems). As further detailed in this Guide, the process involved extensive research into labor market information and credential programs, and dialogue across secondary, postsecondary, and employer stakeholders.

The primary purposes and goals for the Model Programs of Study are to:

1. Provide guidance and exemplars for local programs to adopt or customize as they develop programs of study for approval as part of the Perkins V Plan.
2. Establish a framework for State agencies to develop and implement program supports.
3. Identify priority dual credit courses that are foundational to the industry area and well-situated for statewide scaling and articulation.
4. Define the competencies that should be sequenced across a program of study course sequence to prepare students for the future of work in that industry area.
5. Identify entry points for employers to support coursework and related experiences.

Model Programs of Study supplement and complement other State of Illinois career and technical education and career pathway resources, including the ISBE Career Guide, State of Illinois Career Pathways Dictionary, Career Development Experience Toolkit, Postsecondary and Workforce Readiness Act Recommended Technical and Essential Employability Competencies, State of Illinois Workforce Development Strategic Plan, Workforce Education Strategic Plan, and related state and regional data resources. School districts, community colleges, and their partners are encouraged to use this Guide, state resources, and local program and course information to develop materials for student and family outreach.

The full Model Programs of Study for Education, depicted graphically on pp. 4 – 5, can be used as a reference in local planning processes. The Guide then presents and describes in detail each component of the sequence, including descriptions of the underlying research, analysis, and Advisory Committee input leading to each component:

I. Background and Process for Developing Model Programs of Study (pp. 6 – 7)
II. Priority Occupations and Promising Credentials in Education (pp. 8 – 10)
   a. Promising Credential Program Categories (pp. 8 – 10)
   b. High-Priority Occupations (p. 10)
   c. Levels of Education Needed (p. 10)
III. Programs of Study Sequence Description (pp. 11 – 14)
   a. High School Career-Focused Instructional Sequence and Related Work-Based Learning (pp. 11 – 13)
   b. Recommended High School General Education Courses (p. 14)
   c. Recommended First Year Postsecondary Courses (p. 14)
IV. Strategic Dual Credit Courses – Competency Descriptions (pp. 15 – 17)
   a. Introduction to Education (pp. 15 – 16)
   b. Diversity in Education (pp. 16 – 17)

Appendix A includes the PWR Act Recommended Technical and Essential Employability Competencies for Education as a part of the Human and Public Services pathway and the recommended Essential Employability Competencies.

Appendix B includes the Advisory Committee membership.
POSTSECONDARY OPTIONS

Guided Transfer in Elementary and Secondary Education

1. Early Childhood Education (Birth through 2nd Grade)
2. Early Childhood Education AAS (Gateways ECE Credential 4)
3. Bachelor of Early Childhood Education (Gateways ECE Credential Level 5)
4. K-12 Teaching

Bachelor of Elementary, Secondary, or Special Education AA
Bachelor of Elementary, Secondary, or Special Education

Early Childhood Education (Birth through 2nd Grade)

Professional Educator License

1. Living wage calculations are based on: Glasmeier, Amy K. Living Wage Calculator. 2020. Massachusetts Institute of Technology: livingwage.mit.edu. As of January 2021 for the state of Illinois, the “Living Wage” for 1 Adult + 1 Child equaled $26.27/hour and “near,” defined as 85% of that statewide living wage, was $22.33/hour. In March of 2021, the Living Wage calculator updated its calculations for Illinois, but information presented in this guide reflects the wage levels as of January 2021, when the project team conducted its analysis.

Background and Process for Developing Model Programs of Study

Programs of study are a coordinated, non-duplicative sequence of academic and technical content at the secondary and postsecondary levels that culminate in a recognized postsecondary credential. In Illinois, Perkins V programs of study are aligned with broader State policy goals to promote college and career readiness, including the State of Illinois’ ESSA plan (in particular, the College and Career Readiness Indicator), the College and Career Pathway Endorsement framework and other elements of the Postsecondary and Workforce Readiness Act, the Dual Credit Quality Act, the Illinois WIOA Unified State Plan, and the State’s Career Pathways Dictionary.

Process for Development

Each Model Programs of Study was developed using a data-driven, backward-mapping approach that extended from the areas of job growth down through to the high school course sequence. The specific steps in this analysis included:

1. **Identifying high-priority occupations** in the industry sector that are high-skill, high-wage, and in-demand based on federal Department of Labor data for the State of Illinois.

2. **Identifying promising postsecondary credentials** (degrees or certificates) that are broadly accessible through the Illinois community college system and lead to high-priority occupations.

3. **Mapping the stackable degrees and certificates** that progress to promising credentials.

4. **Identifying strategic community college courses** that appear across the maximum number of promising credentials, provide a broad foundation of knowledge essential to that industry sector, and are feasible for dual credit delivery.

5. **Mapping a course sequence from secondary through the first year of postsecondary** that incorporates strategic early college credit (including at least six early college credits in the career-focused course sequence) and considers industry trends and innovations in career and technical education.

6. **Defining related technical competencies** for the foundational program of study courses that can be utilized to guide course development and postsecondary articulation.
Using Department of Labor\(^1\) data and the MIT Living Wage Calculator\(^2\) for the State of Illinois as a reference, the project team identified “high-priority occupations” as jobs with a positive growth outlook and median salaries near or greater than the living wage for one adult and one child.\(^3\) Thus, a “promising credential” is a degree or college certification that immediately prepares an individual for entry into a high-priority occupation or is a stackable credential for a high-priority occupation.

After identifying the promising credentials in each industry area, the project team analyzed community college programs leading to these credentials from a sampling of six to ten colleges from across Illinois, representing a mix of urban, suburban, and rural institutions.\(^4\) EdSystems analyzed and categorized all of the career-focused and general education courses across the full sampling of the promising credential programs to determine which of these courses:

- Are most common across all programs in the sample,
- Are broadly accessible for dual credit opportunities considering prerequisites and teacher credentialing requirements, and
- Are included within the Illinois Articulation Initiative.

This analysis and categorization process led to a recommended set of “strategic” career-focused and general education courses that provide a critical foundation for the program of study sequence.

Following this internal analysis, EdSystems and ICCB convened a stakeholder Advisory Committee of secondary, postsecondary, and private sector representatives to vet the recommendations and provide expertise and guidance on the development of the Model Programs of Study (see Advisory Committee listing in Appendix B). Over multiple webinars and feedback sessions across four months, the Advisory Committee and smaller working groups provided information about industry trends that may not be reflected in the Department of Labor data, credentials and degrees that are emerging as most promising in the field, on-the-ground implementation considerations for secondary and postsecondary programs, and future of work implications for the sector. The Advisory Committee further informed important decision-points in the Model Programs of Study process, including adjusting the Model of Programs of Study course map and promising credential endpoints, selecting strategic early college credit courses, and identifying key competencies for target courses in the Model Programs of Study currently lacking current statewide articulation. The culmination of EdSystems’ analysis and the input of the Advisory Committee is reflected in the draft Model Programs of Study and course competencies included within this Guide.

In Fall of 2021, EdSystems presented this Education Model POS as a part of a statewide webinar and feedback session. Feedback from that session, as well as changes needed due to 2021 legislation, resulted in changes in early 2022 that were vetted with the original Advisory Committee.

---

\(^1\) U.S. Department of Labor, Career OneStop: [careeronestop.org/ExploreCareers/explore-careers.aspx](http://careeronestop.org/ExploreCareers/explore-careers.aspx)

\(^2\) Glasmeier, Amy K. Living Wage Calculator. 2020. Massachusetts Institute of Technology: [livingwage.mit.edu](http://livingwage.mit.edu)

\(^3\) The “Living Wage” as of January 2021 for 1 Adult + 1 Child, which equaled $26.27/hour for the state of Illinois. “Near” is defined as 85% of that statewide living wage, which is $22.33/hour. In March of 2021, the Living Wage calculator updated its calculations for Illinois, but information presented in this guide reflects the wage levels as of January 2021, when the project team conducted its analysis.

\(^4\) For the analysis of Education, the community colleges surveyed were City Colleges of Chicago, College of DuPage, Elgin Community College, Harper College, and Sauk Valley Community College
Educators have a profound impact and influence on the paths that learners take in their lives, and are crucial to developing a thriving economy and healthy civic community. It is through their teachings and exposures to experiences that learners ultimately discover their career path and the role that they want to play in society.

According to the Illinois State Board of Education’s “Teach Illinois Strong Teachers, Strong Classrooms” report, between 2010 and 2016, the number of candidates enrolling in and completing teacher preparation programs decreased by 53 percentage points.⁵ Workforce concerns in education occur early in the pipeline, and the State has seen fewer young people choosing to enter the teaching profession. The diminishing pipeline of future educators results in vacant teaching positions and leaves some communities disproportionately impacted to supply classrooms with qualified teachers.

A reduced pool of teaching candidates is also concerning for developing a workforce of diverse educators to serve an increasingly diverse student population. According to Advance Illinois, of the 1,006 unfilled teacher positions in the State, 74% are in majority-minority school districts while 81% are in districts where the majority of students are low-income,⁶ illustrating that the most vulnerable students in Illinois are under-served and hardest impacted by teacher vacancies. Building an early interest in education through secondary coursework and work-based learning experiences provides the opportunity to elevate the teaching profession and support students on the path towards becoming a licensed educator.

### Promising Credential Program Categories

To understand the promising credentials in education, there must also be an acknowledgment of the substantial statewide development of a hierarchy of certifications in early childhood education and childcare called the “Gateways to Opportunity.”⁷ Gateways Credentials are awarded and recognized by the Illinois Department of Human Services (IDHS) Bureau of Child Care and Development and almost all Illinois community colleges are Gateways Entitled.⁸ Gateways Credentials can be used to help with employment decisions in community-based early learning programs and are symbols of professional achievement that validate knowledge, skills, and experience.

The Gateways to Opportunity Scholarship Program is available to practitioners working in licensed child care centers, group child care homes, and family child care homes to receive assistance to attain Early Childhood Education (ECE) Gateways Credentials and post-secondary degrees, typically at community colleges across the state. Completion of an Associate of Applied Science (AAS) at a local community college is typically associated with a Level 4 ECE Gateways Credential is now required to seamlessly

### Priority Occupations and Promising Credentials in Education

### POSTSECONDARY OPTIONS

1. **EARLY CHILDHOOD EDUCATION**
   - Early Childhood Education (Birth through 2nd Grade)
   - Early Childhood Education AAS (Gateways ECE Credential 4)
   - Bachelor of Early Childhood Education (Gateways ECE Credential Level 5)

2. **GUIDED TRANSFER IN ELEMENTARY AND SECONDARY EDUCATION**
   - K-12 Teaching
   - Elementary, Secondary, or Special Education AA
   - Bachelor of Elementary, Secondary, or Special Education
   - Professional Educator License
stack towards a Bachelor of Early Childhood Education with an option for a Professional Educator License.

High school students can begin earning a Gateways Credential through completion of training, online modules and academic courses. Students taking additional dual credit courses may also qualify for a Level 2 ECE Credential upon completion of high school and in alignment with a community college basic certificate. Each level provides exposure to and development of the ECE Credential Competencies to prepare students to demonstrate attainment and succeed at the next level.

In light of the Gateways credentials and 2021 legislation around ECE pathways, the project team’s analysis of promising credentials in the education sector tied to Illinois community colleges led to an identification of two overarching categories and additional subcategories:

1. **Guided Transfer in Elementary and Secondary Education**: An Associate of Arts (AA) in Elementary, Secondary, or Special Education is for those looking to pursue a bachelor’s degree and launch careers in K–12 teaching with a Professional Educator License, typically at a public school district or institution.

2. **Early Childhood Education** for careers as an Early Childhood Educator: An AAS Early Childhood Education is typically for those pursuing a career as an early childhood teacher at a community-based childcare organization. As a result of 2021 legislation⁹, AAS Early Childhood Education graduates can now easily pursue a bachelor’s degree and an eventual Professional Educator License. With an AAS in ECE or a Bachelor of Early Childhood Education, individuals would also be eligible to become Education Administrators of Preschool and Childcare Center/Programs.

In prior years, students and community colleges struggled to find four-year programs that would accept an AAS in Early Childhood Education. When students transferred with an AAS to a four-year program, approximately half of their credits were not counted towards their bachelor’s degree. This was a major barrier in cost and time for students that was addressed by 2021 legislation that guaranteed the transferability of AAS degrees in early childhood to state universities with bachelor’s degrees in early childhood.⁹

¹. Living wage calculations are based on: Glasmeier, Amy K. Living Wage Calculator 2020. Massachusetts Institute of Technology: livingwage.mit.edu. As of January 2021 for the state of Illinois, the “Living Wage” for 1 Adult + 1 Child equaled $26.27/hour and “near,” defined as 85% of that statewide living wage, was $22.33/hour. In March of 2021, the Living Wage calculator updated its calculations for Illinois, but information presented in this guide reflects the wage levels as of January 2021, when the project team conducted its analysis.

Now, students are deemed eligible for transfer into Bachelor of Early Childhood programs at public universities if the student meets all the requirements of the AAS degree, earned the Gateways ECE Credential Level 4, and earned a minimum GPA of a 2.0. This transferability will significantly augment the stackability of the AAS degree and higher earning potential.

High-Priority Occupations
The high priority occupations associated with each of these areas are identified in the table entitled Selected Occupations, Wages, and Job Growth. As shown in this table, the occupations associated with Guided Transfer in K–12 teaching all met both the positive growth outlook and living wage criteria described in Section I. In Illinois, the education occupations with relatively high projected growth in terms of number of annual openings through 2026 are Elementary School Teachers and Secondary School Teachers. Also visible in the chart are occupations associated with Early Childhood Education. While the occupations associated with an AAS degree do not currently meet the requirements for a living wage, they are included in this analysis since these occupations are able to stack towards attainment of a bachelor’s degree and Professional Educator License. Moreover, preschool teachers have a ten percent projected increase in growth in Illinois over the next ten years and are seen by the Advisory Committee as a valuable experience to prepare individuals to pursue further education towards a career as a teacher.

Levels of Education Needed
The levels of education needed for the various pathways in the Model Programs of Study to achieve a living wage all include a bachelor’s degree and typically require a Professional Educator License. AAS and AA degrees are included as stackable promising credentials to reflect the pathway that many students take to pursue a Professional Educator License.

Advisory Committee Considerations
Across the occupational areas, the Advisory Committee emphasized the need for future educators to demonstrate knowledge of content and students, understand the role of the larger community in education, and practice reflective and responsive teaching practices. The committee also emphasized the need for students to identify a wide range of career paths in the field of education early in their pathway in order to create a personal career plan and prepare for it. These considerations are reflected in the course sequences and competencies included in the Model Programs of Study, as detailed in Section III below.

---

5 Illinois State Board of Education’s “Teach Illinois Strong Teachers, Strong Classrooms” report
7 Gateways to Opportunity Early Childhood Educator (ECE) Credential Framework
8 Gateways to Opportunities Becoming an Entitled Institution
9 Public Act 102-0174
Generally speaking, students in a Program of Study should start a career-focused instructional sequence with an Orientation/Introduction level course in 9th or 10th grade, with students engaging in career awareness and exploration in the middle school grades if possible. With this early start, students will have more openings in their schedule to complete Skill Development and Capstone/Advanced level options across education, obtain significant early college credits, earn valuable industry credentials, and potentially acquire the College and Career Pathways Endorsement before high school graduation.

As school districts and their community college partners develop the sequence, they should ensure that the high school coursework enables all students in the Education Program of Study to attain both the State’s recommended Technical Competencies for Education and Cross-Sector Essential Employability and Entrepreneurial Competencies (see Appendix A).

The Model Programs of Study for Education begins by introducing students to the broad range of careers in this field, and then enables students to consider the grade level for which they are interested in pursuing a Professional Educator License. Within postsecondary, students are prepared to pursue careers in Early Childhood Education or a Guided Transfer for K–12 teaching. In Early Childhood Education, students can continue the Program of Study sequence through a community college AAS or AA degree aligned with the Gateways Credentials, which leads toward a bachelor’s degree and Professional Educator License.

High School Career-Focused Instructional Sequence and Related Work-Based Learning

* May be offered through Career and Technical Student Organizations (CTSOs) such as Educators Rising, Family, Career and Community Leaders of America (FCCLA), and SkillsUSA Illinois

If courses in this column were accomplished through early college credit, students should take the next required course in the sequence or, if none, additional AAS or Major Courses
field of Education. The career-focused instruction provides high school students with a foundation in teaching at the Orientation/Introduction level, and with the opportunity to focus on Health Safety and Nutrition as students move into the Skill Development level. The capstone level provides the opportunity for students to dive more deeply into Human and Child Growth and Development as well as on how to support diverse students.

Orientation/Introduction
The Model Programs of Study for Education commences at the Orientation/Introduction level with an ISBE CTE Education Pathway Foundations to Teaching course that introduces students to the principles underlying teaching and learning, responsibilities and duties of teachers, and strategies and techniques to deliver knowledge and information. This course should also help students choose an education pathway specialty, such as Early Childhood or Elementary and Secondary Education.

Students should also participate in multiple virtual and in-person site visits to employer locations to better understand authentic education environments, and have the opportunity to engage with professionals in the field. Students should be provided with multiple opportunities for guest speakers from an array of career fields in education to expose students to the variety of career options. Through the orientation course, students should be prepared to document their own personalized career pathway that leads to a promising credential defined in the Model.

Skill Development
The Skill Development level course recommendations in the Model Programs of Study split into two tracks, Elementary and Secondary Education and Early Childhood Education. In the Elementary and Secondary Education Track, the Programs of Study Guide includes Introduction to Education and/or Education Methodology. The Introduction to Education course, envisioned as a dual credit course with a postsecondary institution, is broadly applicable to teaching and gaining a Professional Educator License for all grade levels. Through this course, students will (i) demonstrate understanding of the history and philosophy of education, (ii) apply their understanding of theories to student development and learning, (iii) critically evaluate the role of collaboration and schools as part of a larger community, (iv) identify a wide range of career paths in the field of education and apply reflective thinking skills, and (v) demonstrate understanding of the health, safety, and legal responsibilities of an educator. It emphasizes application of education practices and other basic concepts under close teacher direction, and should utilize authentic projects addressing realistic student needs. Student prerequisites for Intro to Education course vary among community colleges from having no prerequisites to requiring eligibility for English 101. The high school and community college partner should ensure that upon concluding this pathway, students will have earned at least three to six dual credit hours from a postsecondary institution within its Education CTE and career focused course sequence. The course competencies of the ISBE CTE course Educational Methodology scaffold onto those attained in the Intro to Education Course and that Education Methodology could be an alternative if dual credit is not able to be implemented for this course.

In Early Childhood Education, the Programs of Study Guide recommends Health Safety and Nutrition as a dual credit course or any other similar community college course that fulfills the necessary requirements for a ECE Gateways Level 2 credential. Because of 2021 legislation ensuring the transferability of Early Childhood education courses⁹, courses like Health Safety and Nutrition have the double benefit of introducing students to the necessary early childhood coursework necessary to enter the profession, but also can support their transfer to a bachelor’s degree program. The course competencies of the ISBE CTE course Early Childhood Education scaffold onto those attained in the Health Safety and Nutrition course or other similar dual credit courses that fulfill the ECE Gateways Level 2 credential and should be overlapped. If dual credit cannot be implemented, ISBE’s Early Childhood Education could be an alternative to be implemented.

In both tracks, classroom instruction should be coupled with continued employer site visits, an opportunity for students to participate in a job shadow experience at an employer site, and clubs or challenges such as an Educators Rising competition. Team-based challenges should be completed either as activities embedded within course curriculum or through a student/extracurricular organization. Students should be encouraged to engage in any professional education organizations offered at the community college partner to continue to build familiarity with the profession and pathways towards the variety of career options.

Capstone/Advanced
In 12th grade, students engage in advanced topics in education. For those in the Elementary and Secondary Education Track, the capstone recommendation for students is to complete a Diversity in Education dual credit course. There are typically no student prerequisites for this course at the community college level. The Diversity in Education course should require students to (i) understand
how to create an environment of respect and rapport, (ii) recognize the need for cultural competence to support and prepare all students for success, (iii) acknowledge, respond to, and celebrate diverse cultures, (iv) identify, reflect on, and counter their own identities and implicit bias, and (v) recognize their agency and develop the needed skills to advocate effectively within a school community. The Diversity in Education dual credit course content supports students to become future educators that are equipped to support the State’s increasing diversity of students.

Students focusing on Early Childhood Education should enroll in courses aligned with attainment of a Gateways ECE Level 2 Credential that supports their career path. If possible, the course recommended is Child Growth and Development as a dual credit or dual enrollment course. This course provides all students with a strong foundation in the theory and principles of the developmental continuum, an exploration of child development within a socio-cultural context, and other foundational concepts for promising credentials in the field. The Child Growth and Development course is an IAI course for early childhood majors and requires adjunct faculty to have a Master of Early Childhood Education. Thus, feedback from various community colleges is that the course be offered as a dual enrollment course as a capstone experience and that virtual/hybrid models be implemented with local college faculty.

At the capstone level, all students should continue participation in clubs or challenges such as Educators Rising and complete a Career Development Experience (CDE) of at least 60 hours in length. As schedules permit, this Model recommends that students participate in the Education Workplace Experience cooperative course to obtain work experience in fields related to education in addition to the career-focused courses shown in the pathway model.
Whenever possible, it is also recommended that all students in Education earn the State’s Seal of Biliteracy to further develop their skills and ability to serve the diversity of students who are English language learners. The high school and community college partner should ensure that upon concluding the capstone course and the other recommended secondary courses in the education course sequence, students will have earned at least six to twelve dual credit hours from the community college applicable to aligned Early Childhood Education and Guided Transfer programs.

**Recommended High School General Education Courses**

The Model Programs of Study for Education identifies several key considerations for general education coursework:

- **In science**, students should follow a standard science sequence, and where possible, complete their science course as either Advanced Placement or dual credit.

- **In math**, students should complete the highest math course possible in a statistics-based course sequence to be prepared for the full range of career options in Education, especially for those students interested in pursuing a Professional Educator License in Mathematics. Students should take a dual credit General Education Statistics course at the Capstone level. Students that do not demonstrate readiness for an early college math course during their senior year of high school should enroll in a Transition to Quantitative Literacy and Statistics Transitional Math Course that guarantees placement into General Education Statistics at the postsecondary level.

- **In English**, students prepared for college-level coursework in their senior year should enroll in a dual credit English Composition course (if available) or Advanced Placement English Language and Composition. If students are not prepared for college-level coursework, students should enroll in a Transitional English course that guarantees placement into the partner community college’s English Composition course.

**Recommended First Year Postsecondary Courses**

The recommended first-year postsecondary courses in the Model Programs of Study for Education build upon the knowledge and skills recommended at the capstone level. As with high school programs, community colleges should pursue opportunities to integrate and align education coursework and work-based learning opportunities.

If not completed already, students in both tracks will take the Child Growth and Development IAI course, as well as a course such as The Exceptional Child that focuses on supporting children with exceptional cognitive, social, physical, and emotional needs. In addition, students should seek out Educational Psychology as a higher level advanced course in this area. Lastly, students interested in pursuing a career in Early Childhood Education are recommended to pursue AAS course sequence, as appropriate, with supplementary coursework aligned with Gateways ECE Credentials. In the general education course areas, students will take the 100-level required courses. If the 100-level courses have been accomplished through early college credit, students will take the next required course in the subject or, if none, additional AAS or major courses.
As mentioned, EdSystems and ICCB convened a stakeholder Advisory Committee of secondary, postsecondary, and private sector representatives to vet the Model Program of Study recommendations. A smaller working group further convened to identify key competencies for the target early college courses in the Model Program of Study currently lacking current statewide articulation. In education, those courses were Introduction to Education and Diversity in Education.

CONTINUED: INTRODUCTION TO EDUCATION

**Key Competencies**

### Reflection and Professional Growth
- Future educators can identify the knowledge and skills necessary to be an effective educator including meeting individual student needs, serving diverse learners, adhering to a professional code of ethics, and understanding school governance in order to reflect and improve upon one’s own practice.
- Future educators can apply reflective thinking skills in order to learn from observational and practical classroom experiences.
- Future educators can think critically about their own assumptions, biases, lived experiences and understandings of education in order to explore alternative approaches and ideas.
- Future educators can identify a wide range of career paths in the field of education in order to create and prepare for a personal career plan.

### Health, Safety, and Legal Responsibilities
- Future educators can use their understanding of health, safety, and legal expectations in order to adhere to organizational procedures and local, state, and federal law.
- Future educators can analyze laws, policies, and procedures in education in order to understand how they impact instruction and students.
- Future educators can design a safe and ethical learning environment in order to ensure all students feel respected, valued, and able to learn.

---

DIVERSITY IN EDUCATION

**Key Competencies**

### Creating an Environment of Respect and Rapport
- Future educators can use their understanding of the diversity of language, culture, and ability in order to ensure an inclusionary environment for all students to learn.
- Future educators can use their understanding of motivational, social and physical/environmental elements within the classroom in order to ensure an inclusionary environment for all students to learn.
- Future educators can recognize systemic historical obstacles and inaccuracies in order to create classroom cultures that dismantle bias and promote equity.

### Demonstrating Knowledge of Teaching Diverse Students
- Future educators can describe and demonstrate strategies to enrich, maintain, and alter learning environments in order to engage and motivate student learning.
- Future educators can use their understanding of cultural, linguistic, cognitive, physical, and social and emotional differences in order to plan instruction that meets the needs of each student.
- Future educators are culturally competent, and can identify and apply culturally responsive and anti-racist teaching practices to ensure equitable access to learning.

**Key Competencies**

<table>
<thead>
<tr>
<th>Demonstrating Knowledge of Diverse Students</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Future educators can identify how a variety of factors shape the way students learn, including belief systems, human development (physical, social and emotional, cognitive, linguistic), past experiences, talents, prior knowledge, and economic circumstances.</td>
</tr>
<tr>
<td>• Future educators can acknowledge, respond to, and celebrate diverse cultures in order to provide full, equitable access to education for students from all cultures.</td>
</tr>
<tr>
<td>• Future educators can apply their understanding of implicit bias, stereotypes, language and cultural barriers, systemic racism, current events, and historical context in order to prevent misconceptions, promote connections with students and families, and improve classroom instruction.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Reflective and Responsive Teaching</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Future educators can identify, reflect on, and counter their own identities and implicit biases in order to support and build relationships with students and parents to ensure diverse voices are represented.</td>
</tr>
<tr>
<td>• Future educators can use their understanding of cultural competency, current and historical events, cross-curricular connections, and out-of-classroom realities in order to create linkages across content areas and students’ lived experiences.</td>
</tr>
<tr>
<td>• Future educators apply a solutions-oriented mindset in order to overcome external factors and impact student success.</td>
</tr>
<tr>
<td>• Future educators can analyze curriculum and classroom practices in order to ensure that diverse voices are represented and infused in all learning activities.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Professionalism, Leadership, and Advocacy</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Future educators can identify and understand the role of professional organizations and advocacy groups in order to elevate their own voices and become change agents.</td>
</tr>
<tr>
<td>• Future educators can use their understanding of community and family engagement in order to connect students to opportunities for growth and effectively support learning through partnerships with caregivers and other support systems.</td>
</tr>
<tr>
<td>• Future educators can recognize the agency of traditionally marginalized populations in order to enable these groups to have a voice in the school community.</td>
</tr>
<tr>
<td>• Future educators recognize their responsibility and have the skills to advocate effectively within the school community in order to ensure the needs of all students are met.</td>
</tr>

### APPENDIX A.1: PWR Act Recommended Technical and Essential Employability Competencies for Human and Public Services

#### TOP 10 TECHNICAL COMPETENCY STATEMENTS FOR EDUCATION AS PART OF HUMAN AND PUBLIC SERVICES

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PLANNING AND PREPARATION</strong></td>
<td></td>
</tr>
<tr>
<td>Childhood &amp; Student Development</td>
<td>Students can use their understanding of learner development theory from early childhood through adult learning including cognitive development, self-esteem, motivation, perseverance, and intellectual risk taking in order to provide appropriate content and supports for students.</td>
</tr>
<tr>
<td>Curriculum &amp; Program Design</td>
<td>Students can use their understanding of effective teaching strategies, scope, and sequence in order to design a logical curriculum and classroom experience that meets individual student and group academic readiness.</td>
</tr>
<tr>
<td>Curriculum Relevance &amp; Collaboration</td>
<td>Students can use their understanding of current events, cross-curriculum connections, and out-of-classroom realities to create linkages among content areas and learners’ lived experiences.</td>
</tr>
<tr>
<td><strong>CLASSROOM ENVIRONMENT</strong></td>
<td></td>
</tr>
<tr>
<td>Managing &amp; Monitoring Learning</td>
<td>Students can describe and demonstrate strategies to enrich, maintain, and alter learning environments in order to engage and motivate student learning.</td>
</tr>
<tr>
<td>Equitable Treatment</td>
<td>Students can use their understanding of diversity of language, culture, and ability to ensure an inclusionary environment for all students to learn.</td>
</tr>
<tr>
<td>Learning Environment</td>
<td>Students can use their understanding of motivational, social and physical environmental elements to optimize learning and establish a positive environment for all learners.</td>
</tr>
<tr>
<td><strong>PROFESSIONAL RESPONSIBILITIES</strong></td>
<td></td>
</tr>
<tr>
<td>Citizenship, Family, &amp; Community Relationships</td>
<td>Students can use their understanding of community and family engagement in order to connect students to opportunities and effectively support learning.</td>
</tr>
<tr>
<td>Health, Safety, &amp; Legal Responsibilities</td>
<td>Students can use their understanding of health, safety, and legal expectations in order to adhere to organizational procedures, local, state, and federal law.</td>
</tr>
<tr>
<td><strong>INSTRUCTION</strong></td>
<td></td>
</tr>
<tr>
<td>Evaluation &amp; Assessment</td>
<td>Students can use their understanding of learning standard and multiple measures and methods to demonstrate learning in order to evaluate growth in learning and adjust to learners’ needs.</td>
</tr>
<tr>
<td>Observation &amp; Adaptation</td>
<td>Students can use their understanding of individual student and classroom observation in order to adjust curriculum to meet individual and group learning needs.</td>
</tr>
</tbody>
</table>
## TOP 10 CROSS-SECTOR ESSENTIAL EMPLOYABILITY COMPETENCY STATEMENTS

<table>
<thead>
<tr>
<th>Competency Area</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Teamwork &amp; Conflict Resolution</strong></td>
<td>Students can use their understanding of working cooperatively with others to complete work assignments and achieve mutual goals.</td>
</tr>
</tbody>
</table>
| **Communication** | **Verbal:** Students can use their understanding of English grammar and public speaking, listening, and responding, convey an idea, express information, and be understood by others.  
**Written:** Students can use their understanding of standard business English to ensure that written work is clear, direct, courteous, and grammatically correct.  
**Digital:** Students can use their understanding of email, keyboarding, word processing, and digital media to convey work that is clear, direct, courteous, and grammatically correct. |
| **Problem Solving** | Students can use their critical thinking skills to generate and evaluate solutions as they relate to the needs of the team, customer, and company. |
| **Decision Making** | Students can use their understanding of problem solving to implement and communicate solutions. |
| **Critical Thinking** | Students can use their understanding of logic and reasoning to analyze and address problems. |
| **Adaptability & Flexibility** | Students can use their understanding of workplace change and variety to be open to new ideas and handle ambiguity. |
| **Initiative & Self-Drive** | Students can use their understanding of goal setting and personal impact to achieve professional goals and understand personal impact. |
| **Reliability & Accountability** | Students can use their understanding of commitment, time management, and follow through to ensure that a professional team functions properly and meets collective goals. |
| **Cultural Competence** | Students can use their understanding of diversity and inclusion to communicate and work effectively across a multitude of abilities, cultures, and backgrounds. |
| **Planning & Organizing** | Students can use their understanding of time management to plan effectively and accomplish assigned tasks. |
APPENDIX B: Advisory Committee Membership

Natasha Allen  
Director for Career & Technical Education  
Illinois Community College Board

Melina Angeles  
Early College & Career Education Coordinator  
Chicago Public Schools

Rhonda Bell  
Career & Technical Education Manager  
Chicago Public Schools

Carmen Bergmann  
Director of PD & Leadership Support  
Regional Office of Education #17

Bill Curtin  
Illinois Teacher Leadership Coach  
Teach Plus

Jessica Day  
Teach Plus Teaching Policy Fellow  
O’Fallon Township High School

Bridget French  
Executive Director of College & Career Readiness  
Rockford Public Schools

Marianne Hunnicutt  
Dean, Social and Behavioral Sciences  
College of DuPage

Lindsey Jensen  
2018 Illinois Teacher of Year  
Dwight Township High School

Chuck Lane  
Superintendent  
Centralia High School

Paula Luszcz  
Early Childhood Education Department Chair  
Oakton Community College

David Osborne  
Principal Consultant  
Illinois State Board of Education

Tom McCulley  
Dean of Liberal Arts & Social Sciences  
Heartland Community College

Cheree Morrison  
Director of Secondary Schools & Programs  
Springfield Public Schools

Jim O’Connor  
Project Director  
Advance Illinois

Natalie Page  
Dean of Academic Services  
South Suburban College

Jenny Parker  
Associate Vice Provost for Educator Licensure & Preparation  
Northern Illinois University

Denise Petty  
Teacher Instructional Leader  
Springfield Public Schools

Tom Philion  
Dean, College of Education  
Roosevelt University

Whitney Thompson  
Senior Director for Career & Technical Education  
Illinois Community College Board

Linda Thorson  
Teacher  
Rolling Meadows High School

Kristina Valentine  
Human & Public Services CTE Specialist & Principal Consultant  
Illinois State Board of Education

Lead Education Systems Center Staff

Juan Jose Gonzalez  
Pathways Director

Jon Furr  
Executive Director
